

Muhammad Fahad

React JS Developer

mistr.fahad06@gmail.com | (+92) 3079685690 | <https://github.com/fahadmun06>

SUMMARY

I'm excited to find an engaging job as a Frontend Developer. I've got a lot of experience with React.js, which I'll use to make creative and user-friendly web apps. I really love frontend development and I'm dedicated to keeping up with the newest industry trends and best ways of working. This way, I'll make sure that the apps I work on are always top-notch.

ACADEMIC PROJECTS

Students Data Management (Oct 8 - 2023)

I built a Student Data Management Dashboard using Firebase which manages students' Contact info, Attendance, and course enrollment - HTML5, CSS3, JavaScript, React Js, Firebase

E-commerce Book Website (Aug 15 - 2023)

I Developed and launched an e-commerce website for books using Firebase as the backend. Enabled users to browse, search, and purchase books online and implemented user authentication - HTML5, CSS3, JavaScript(ES6), React Js, Firebase.
